MOTIONS

9. **Call on the Nigerian Export Processing Zone Authority (NEPZA) to Establish a Special Agricultural Processing and Export Zone in Kebbi State:**
Hon. Ibrahim Mohammed:

The House:

Notes that the Nigerian Export Processing Zones Authority (NEPZA) was established to promote, regulate, and facilitate establishment of Export Processing Zones (EPZs) and Special Economic Zones (SEZs) across Nigeria to enhance industrialisation and economic diversification, Special Economic Zones (SEZs) provide businesses with tax incentives, improved infrastructure, and an enabling environment to boost industrial production and exports;

Also notes that Kebbi State is one of Nigeria's leading agricultural-producing states, known for large-scale production of rice, fish, groundnuts, millet, maize, and livestock, making it a prime location for agro-processing and export activities.

Aware that establishment of a Special Agricultural Processing and Export Zone in Kebbi State will add value to agricultural produce, reduce post-harvest losses, create employment opportunities and boost Nigeria's non-oil export earnings;

Recognises that the development of such zone will attract local and foreign investors, provide modern infrastructure such as storage, processing, and logistics facilities and link local farmers to international markets, thereby enhancing food security and economic growth;

Also aware that the Federal Government has prioritised economic diversification through industrialisation and increased agricultural productivity, and establishing a Special Economic Zones in Kebbi State will aligns with national objectives;

Concerned that despite agricultural potential in Kebbi State, the absence of an export processing zone has forced farmers to sell raw produce at lower prices, and hindered the State's contribution to agro-industrial development in the country;

Worried that Kebbi State may miss out on essential Federal and International Investments in Agro-Industrial Development due to lack of a designated Special Economic Zone (SEZ) and insufficient storage and processing facilities, thereby exacerbating food insecurity, economic inefficiencies and also hindering potential export revenue;

Cognizant that Establishment of a Special Agricultural Processing and Export Zone in Kebbi State by NEPZA aims to leverage Public-Private Partnerships (PPP) for financing infrastructure, involving the Federal Government, Kebbi State Government, and private investors will create employment, enhance the processing of rice, fish, groundnuts and livestock into finished products, increase market value and boosting Nigeria's export potential.

Resolves to:

- (i) urge the Nigerian Export Processing Zones Authority (NEPZA) to prioritise the establishment of a Special Agricultural Processing and Export Zone in Kebbi State to enhance agricultural industrialisation and export capacity;
- (ii) also urge the Federal Ministry of Industry, Trade and Investment to collaborate with the Kebbi State Government and private sector players in fast-tracking establishment of the zone;

- (iii) further urge NEPZA to submit a feasibility study report to the House within one month time frame on the process of setting up the zone in Kebbi State;
- (iv) mandate the Committees on Commerce and Industry to engage NEPZA and relevant stakeholders to facilitate the implementation of this initiative.

**10. Indiscriminate Sale of Land and Public Assets in Federal Housing Authority FHA/ENL Estates, Guzape:
Hon. Esosa Iyawe:**

The House:

Notes that the Federal Housing Authority Paradise Hills Estate Guzape, built in collaboration with the ENL Consortium, is a unique development, well planned in an exquisite layout and good topography, surrounded by hills for security and fully sold out;

Also notes that having sold the buildings, the developers are indiscriminately mining the hills made of sand to provide security cover and geographical stability for the estate to create additional plots;

Cognisant that the hill loses its texture during the rainy season and creates mudslides that make some of the estate roads impassable;

Concerned that the heavy rainfall will exacerbate the already precarious situation of estate roads and adjoining houses, while the daily mining activities are causing tremors in Guzape and its immediate environs, undermining the structural integrity of the buildings in the locations;

Worried that the indiscriminate mining of the surrounding hills is a threat to government estates in Guzape and private properties with consequential loss of lives;

Also worried that most estates in the FCT, like the FHA/ENL consortium, go off-plan, allocating areas not within the original master plan when selling to prospective buyers;

Resolves to:

- (i) urge the Federal Capital Development Authority to provide clarification and monitor development of the Federal Housing Authority Paradise Hills Estate, Guzape, and other estates in the Federal Capital Territory; and
- (ii) mandate the Committees on Public Assets, Housing and Habitat, and FCT to investigate and halt further allocation and development of plots not in the master plan of the FHA/ENL Estate in Guzape and other government estates in FCT.

**11. Need to Engage Inmates in farming Activities in the Nigerian Correctional Centres:
Hon. Folorunsho Adegbesan:**

The House:

Notes that in most African countries, the average diet provided in correctional centres contributes to malnutrition among inmates to the extent that many courts in Africa have expressed concern over the frequency, quantity, and quality of food served in correctional centres, deeming it cruel, inhumane, and degrading treatment;

Also notes that worldwide, approximately eleven (11) million people are currently being held in correctional centres. In Nigeria, the total number of inmates in correctional centres across the country is 84,741, comprising 82,821 males and 1,920 females;

Aware that correctional centres and other organisations around the world are creating and implementing sustainable food programmes to bring better nutrition to incarcerated people;

Also aware that there are positive examples of how correctional centres have tried to deal with food insecurity in African countries, for instance in:

- (i) 2017, a prison in Mozambique produced one tone of potatoes, which were used in the prison and shared with other prisons;
- (ii) Botswana, irrigation farming was introduced in 2025 to combat drought impacts on prison farms and ensure consistent prison food production, focusing on sorghum, cowpeas, lablab, and maize;
- (iii) Tanzania, in 2024, environmentally friendly and cost-effective stoves designed to operate using alternative charcoal and minimal firewood were introduced in 126 prisons;
- (iv) 2024, Mauritius introduced a fish processing plant at one of its prisons;
- (v) Ghana Prisons Service equips inmates with modern cultivation skills to create agricultural activity in Ghana's prisons and ensure that the standards of its prison system are consistent with internationally recognised norms and
- (vi) Namibia, Hydroponic systems have been utilised to improve food security in a female prison.

Worried that inadequate access to sufficient food compromises the immune system and leads to nutritional deficiencies, weight loss, and increased susceptibility to infectious diseases;

Also worried that the World Health Organisation (WHO) reports that food affects physical and mental health and is key to an inmate's successful rehabilitation and resettlement upon release;

Observes that food sustainability in correctional centres can help inmates receive nutritious food, learn about sustainable agricultural practices, and obtain vocational training experiences that can help them integrate back into society;

Convinced that engaging inmates in farming will enhance food security, improve nutrition and promote sustainable agriculture in Nigeria and beyond

Resolves to:

- (i) urge the Federal Ministry of Agriculture and Food Security and the Nigerian Correctional Service to articulate and implement policy measures to engage inmates in farming;
- (ii) mandate the Committee on Interior and Reformatory Institutions to ensure compliance and report to within four (4) weeks for further legislative action.

12. Need to Address the Collapse of Local Rice Farming and Rice Mill in Nigeria:

Hon. Muhammed Buba Jajare:

The House:

Notes that the policies of late President Muhammed Buhari have discouraged the importation of rice and increased large-scale farming, leading to establishment of rice mill across the country, thereby creating employment for millions of citizens as well as improving the country's Gross Domestic Product;

Worried that the 180-day import duty waiver granted by the Federal Government to import husked brown rice and other food items has severely impacted local producers, thus leading to the reduction in the demand for local rice, leaving farmers with unsold products and forcing rice mills to shut down or scale back operations;

Also worried that the unchecked smuggling of rice through porous borders has made legitimate operators uncompetitive, compromised food safety, and emboldened criminal activities;

Disturbed that frequent changes in government policies have disrupted the agricultural production value chain, making it challenging for farmers to plan for the future;

Concerned that if this is not addressed appropriately, the country may be losing billions of naira due to the closure of most of these rice mills, which will lead to many Nigerians losing their jobs;

Resolves to:

mandate the Committee on Agricultural Production and Services to investigate the Collapse of Local Rice Farming and Rice Mill in Nigeria and report within four (4) weeks for further legislative action.

13. Need to Investigate the Non-Reporting and Non-Remittance of Equity Liquefied Natural Gas (LNG) to NNPC Limited:
Hon. Nnamdi Ezechi:

The House:

Notes that the Nigeria Liquefied Natural Gas Limited (NLNG) was incorporated in 1989 as a joint venture between the Nigerian National Petroleum Company (NNPC Limited), Shell, TotalEnergies and Eni, with NNPC Limited holding the largest equity share of 49%;

Also notes that NNPC LNG Limited was incorporated in 2012 in the Cayman Island as a subsidiary of NNPC Limited to manage the sale of Liquefied Natural Gas (LNG) on behalf of the group;

Concerned that the financial transactions, statements, and operations of NNPC LNG Limited in the Caymans have not been transparently reported to either NNPC Limited or LNG, resulting in potential non-remittance of dividends, taxes, and other statutory payments due to the Federal Government of Nigeria;

Worried that certain deductions are allegedly being made from NLNG proceeds, including from the sale of Liquefied Natural Gas known as Equity LNG, without the formal notification, disclosure, or approval of the Federal Government, thereby raising serious concerns of financial impropriety and potential loss of national revenue;

Resolves to:

mandate Committee on Gas Resources to investigate the operations, financial reporting, and remittances of NNPC LNG Limited with respect to NLNG and report within four (4) weeks for further legislative action.

14. Need to Investigate Failure of Oil/Gas Producing Companies to Release 3% of its Annual Operating Expenditures to Host Communities and the Refusal to Incorporate Host Communities Development Trust Fund under the Petroleum Industry Act, 2021:
Hon. Hart Cyril Godwin:

The House:

Aware that in 2021 the Petroleum Industry Act, (PIA) was enacted to provide legal governance, regulatory, and fiscal frameworks for the Nigerian Petroleum Industry and the development of Host Communities;

Notes that Section 235 subsection (1) of the PIA makes it mandatory for every licensee or lessee (settlor) whose area of operations is located in or appurtenant to any community to incorporate the Host Communities Development Trust Fund for the benefit of the host community; Section 236 also stipulates that Host Communities Trust Fund shall be incorporated within 12 months from the effective date for an existing oil mining lease;

Also notes that Section 240 subsection (2) of the Act provides that each settlor shall make an annual contribution to the applicable Host Communities Development Trust Fund of an amount equal to 5% of its actual annual operating expenditure of the preceding financial year in the upstream petroleum operations affecting the host communities for which the applicable Host Communities Development Trust Fund was established;

Worried that some Oil Companies violate the provisions of Section 236 of the PIA by failing to incorporate the Host Communities Development Trust Fund in their areas of operation within the period stipulated in the Act, while others have bluntly refused to incorporate Host Communities Development Trust Fund as required by the law as at when due;

Concerned that most Oil Companies failed to fund the Host Communities Development Trust as incorporated and have not been able to pay the 3% of the actual annual operating expenditures to the Host Communities Trust Fund in the areas of operation;

Dismayed that failure to fund the Host Communities Development Trust Fund has hampered the development of the host communities where the Companies operate;

Cognizant of the provision of Section 297 Subsection (1) of the PIA, which makes a breach of the Act punishable with the payment of administrative penalties per day, and for continuous breach and Section 238 makes failure to incorporate a Host Communities Development Trust, a ground for the revocation of a holder's license or lease;

Resolves to:

mandate the Committee on Host Communities to investigate the failure of the Regulatory Agencies to act decisively, failure of the Oil Companies to release amounts equal to 3% of its annual operating expenditures to host communities and their refusal to incorporate Host Communities' Development Trust Fund under the Petroleum Industry Act, 2021 and report within four (4) weeks for further legislative action.
